**RE: Proposed Changes to The Pipeline Safety Act Regulations  
C-46 Canada Gazette, Part I, Published March 19, 2016**

Professional Surveyors Canada and its members are proposing changes to the proposed regulations as outlined in the attached document. Our positions are in agreement with the changes proposed by Professional Surveyors Canada's members regarding Bill S-233. Please note that our organization was not consulted prior to implementation of the current act nor initial regulations. It is hoped that with further effort and open dialogue, such oversight will not occur in future. These positions will be translated into French and posted on our website shortly.

Professional Surveyors Canada supports the use of pipelines and effective laws and regulations to foster public confidence and safe practices. The proposals attached are meant to allow the federal laws and regulations to provide guidance, confidence and common standards to other jurisdictions. We hope you understand our positions and look forward to working with the NEB, legislators and the industry to reduce incidents for our workers and the public.

If you have any questions, please call or write

Sincerely,

---

Wilson Phillips, P. Surv. MLS, CLS  
Chair
